FOR IMMEDIATE RELEASE

Sangamon County Awards Contract to *IPMobileNet*

IRVINE, CALIFORNIA, November 11, 2003 -- *IPMobileNet* announces it has received an order from Sangamon County, Illinois to supply a countywide *IPMobileNet* mobile data system. Sangamon County will be one of the first to implement *IPMobileNet*'s new 32 kbps products, which offers one of the fastest effective throughputs in the industry.

IPMobileNet will provide Sangamon County a digital mobile data system based on its native end-to-end *IPSeries* technology. Sangamon County's mobile network serves more than 50 agencies, including the Springfield Police, Sangamon County Sheriff, Springfield Fire Department, Federal Park Police, and numerous other local police and fire agencies. Springfield, Illinois is the birthplace of President Abraham Lincoln, and his home is protected by the Federal Park Police, a user of the new *IPMobileNet* system.

"We have evaluated numerous systems, and in the end selected *IPMobileNet*'s native IP architecture for the county," stated Mallorie Wamsley, Director of the County's 911 System, which is the oversight agency for the mobile network. "*IPMobileNet* has worked closely with the County throughout this process and we are excited to move forward with our deployment. *IPMobileNet*'s innovative products and technology roadmap convinced us that this was the right solution."

"This is a very important program for us", said Keith Cowan, President & CEO of *IPMobileNet*. "Sangamon County represents the type of top tier customer that has come to rely upon *IPMobileNet*'s reliability for mission critical communications. We are committed to offering our customers the most advanced technical solutions and the greatest support in the industry."

"We are excited to work with Sangamon County 911 as they deploy a state-of-the-art mobile data system," said Brian Purcell, Vice President, Sales and Marketing. "This system will allow the county to provide real time support to a variety of Local, State and Federal government agencies."

About IPMobileNet

IPMobileNet is a leading designer, manufacturer and integrator of private wireless data solutions. With more than two decades of innovation in wireless data communications, IPMobileNet built its world-class reputation by providing highly reliable mobile data communications networks for the public safety, utility, transportation and government markets. IPMobileNet has developed unique technology that addresses the specific needs of the private mobile wireless market, including the first 100% native IP system for voice and data, a TDMA multiplexing scheme that quadruples channel capacity, and a sophisticated diversity receiver technology that significantly improves network throughput and reliability in difficult urban and suburban environments. www.ipmobilenetinc.com

IPMobileNet is a venture capital backed company whose investors manage in excess of \$1 billion. These investors include Kline Hawkes & Co. (www.klinehawkes.com), FA Technology Ventures (www.fatechventures.com), Sorrento Ventures (www.sorrentoventures.com) and E*Capital Corporation (www.e-cap.com).
